Skills

Offensive security

Kali Linux · Penetration Testing · Vulnerability Assessment · Red Team Operations

Cybersecurity

Network Security · Packet Analysis · Security Assessment · Risk Mitigation

Development

Python · C++ · JavaScript · Flask · Scikit-learn · PHP · HTML/CSS

Networking

Cisco Packet Tracer · Wireshark · Protocol Fundamentals · Network Monitoring

Tools

Ubuntu/Linux · VS Code · MySQL · Oracle DB · Proteus 8

Certifications

Network Security
Cisco Networking Academy, Apr 2026

Ethical Hacking
ITSOLERA PVT LTD, Nov 2025

About

Computer Science graduate from HITEC University with hands-on Red Team experience and a focus on AI-driven network security. Certified in Network Security (Cisco) and Ethical Hacking (ITSOLERA). Seeking a cybersecurity internship or junior SOC / penetration testing role.

Experience

Cybersecurity Intern, Red Team
Sep 2025 to Oct 2025

ITSOLERA PVT LTD, Islamabad (Remote)

- Executed offensive security operations in the Red Team: reconnaissance, enumeration, and exploitation exercises.
- Developed internal pentest tooling and performed vulnerability assessments, translating findings into risk mitigation reports.
- Gained hands-on exposure to real-world security workflows, attack methodologies, and assessment frameworks.

Projects

AI-Powered CCTV Network Anomaly Detection
Final year

Python, Scikit-learn, Flask, Anomaly Detection, Network Security

Built an ML-driven monitoring system that detects suspicious network behavior in CCTV infrastructure in real time and shows events on a live web dashboard. It covers the gap where traditional CCTV records footage but never analyzes network activity.

Online Blood Bank
Full-stack

HTML, CSS, JavaScript, PHP, Oracle DB, XAMPP

Designed a responsive blood donation platform with multiple user roles (donor, requester, admin), real-time blood-type matching, and emergency request routing.

Dual AI Chatbot
AI / ML

Python, Flask, Machine Learning, NLP

Developed an AI-powered medical chatbot with conversational symptom collection and disease prediction, backed by a Flask API and web interface.

Education

BS Computer Science, HITEC University
Sep 2024 to Jul 2026

Taxila. Cybersecurity and network security focus

BS Computer Science, IST
Sep 2022 to Jun 2024

Institute of Space Technology. Transferred to HITEC

Languages and learning

Languages	English (Professional), Urdu (Native), Pashto (Conversational)
Learning	TryHackMe SOC Level 1, Wireshark deep packet analysis, Python for security automation
